Return of premium feature

We will automatically pay the policy value at the end of the guaranteed term period provided the policy is in force and the insured is still living. Upon payment of the policy value, the policy continues in force as long as the required premiums are paid. There is no policy value after the end of the guaranteed term period.

Conversions: A percentage of the policy value is also payable upon conversion or early termination of the policy. The policy value is a percentage of the base premium, less any indebtedness.

Loans: Policy loans are permitted. The policyowner may borrow against the policy value at any time it is in force provided a request is made in writing and the policy is assigned to us as sole security.

Surrenders: If premiums are discontinued while there is policy value, the policy may be surrendered for cash or placed on reduced paid-up term insurance.

Celebratory cigar exception

Cincinnati Life offers Preferred Plus and Preferred consideration for applicants who meet all the outlined class criteria other than having smoked celebratory cigars. This allows for no more than six cigars per year and a urine specimen must be negative for nicotine. The celebratory cigar exception is **available by request only**.

Here is how to apply for this exception:

- Bring the exception to your underwriter's attention and include a cover letter
- For full applications, be sure to include the number of cigars smoked in the past year when completing the tobacco questions
- For the Life e-App, indicate the request and the number of cigars smoked per year in the agent cover letter during the Life e-App process
- For the Lite application process, if the client indicates cigar use during the phone interview, ExamOne asks how many cigars the client has smoked in the prior year
